25X1

REPORT NO.

DO NOT CIRCULATE

The attachment gives statistics on the procurement and consumption of raw material by plants under the Main Administration for Heavy Machine Construction of the DDR Ministry of Machine Construction.

All amounts are in metric tons and cover the period from 1 January to 31 August 1952. Differences between the figures given for total allocations received since the beginning of 1952 in this report and those given in previous reports stem from the fact that allocations are taken from statistics of the Material Balance Department and not from the inventories of the individual plants.
